

MEDICAL HAIR PROSTHESIS FOR ALOPECIA & CHEMOTHERAPY PATIENTS

Discreet. Compassionate. Medically Aligned Support.

Phoenix Freedom Wigs South Africa provides high-quality medical hair prostheses for individuals experiencing medically related hair loss, including alopecia, chemotherapy-induced hair loss, and other dermatological or autoimmune conditions.

Our consultations are conducted privately, respectfully, and with full understanding of the psychological and emotional impact of medical hair loss.

WHAT MAKES OUR MEDICAL WIGS DIFFERENT

- Natural scalp appearance (medical-grade silicone cap)
- Secure vacuum-fit technology (no adhesives required)
- Suitable for sensitive scalps & complete hair loss
- Can be cut, styled, coloured, and worn in a ponytail
- Designed for long-term medical wear, not cosmetic use.
- Suitable for men, women, and children experiencing medical hair loss, including chemotherapy and alopecia.
- For paediatric patients, a specialised Grow Cap is available to accommodate head growth and support longer, comfortable wear as the child grows.

Freedom Wig Silicone Cap & Natural Scalp Design

We can provide formal quotations for medical aid submissions, including supporting supplier documentation and product information for use alongside a doctor's motivation letter. Guidance is provided on appropriate classification as a medical hair prosthesis rather than a cosmetic wig.

CONSULTATIONS ARE

- Private and confidential
- Calm and supportive
- No-obligation
- Conducted by a consultant who personally understands medical hair loss and wears the freedom prosthetic.
- Available in the comfort and privacy of your own home

Partnering with healthcare professionals to provide compassionate, medically appropriate hair prosthesis solutions.
